Experiences

Project: SportsFlima (Sports Management Platform)

March 2024 - At the moment

Developing a platform for managing sports classes, with backend in Node.js and ExpressJS. REST API for integration with mobile applications using Expo. Data storage in MySQL and PostgreSQL, including photos and documents. Payment processing via OpenPix and login/registration functionalities.

Callo (Service Request Platform)

August 2023 - At the moment

Developing an application that combines delivery and transportation services, similar to iFood and Uber.
Using NestJS for the backend, React Native for the mobile application and Next.js for the web interface.
Implementation of microservices with storage in MySQL and PostgreSQL.

Projects

Multiform Validator

July 2023 - At the moment

Multilingual library made for validation, various form fields, such as: email, telephone, password, cpf, cnpj, credit card, magic numbers for image mimetype validation and much more.

Azure Translator Code

September 2023 - At the moment

Tool to translate JSON files into multiple languages using the Azure Cognitive Translator service. This library supports translating JSON files across multiple folders or within a single folder, depending on your needs.

Market Helper

September 2023 - August 2024

Complete solution to help control expenses and organize shopping lists. With this tool, users can easily record the name, value and quantity of products they want to buy at the market.

More about me
I am passionate about technology and always looking to create innovative solutions. I have a strong commitment to the open-source community, actively contributing to projects on GitHub and demonstrating my ability to solve complex problems. My projects range from apps on the Play Store to initiatives that add real value to the community. I am always open to new challenges and opportunities for continuous learning.

German Beginner

Other Experiences

Administrative Assistant - Sodexo Brazil - Salvador, BA

I assisted in bureaucratic and organizational tasks, contributing to the efficiency of internal processes.
March 2019 - January 2021

Chemistry Scholarship - UFRGS

I worked as a scholarship holder in chemistry, after enrolling in the bachelor's degree in chemistry, which was later changed to computer science (not completed).
September 2022 - June 2023 | Porto Alegre, RS
